Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Regarding independent ***claim 11***, among the cited prior art, the following is the closest prior art relevant to the claimed invention:

a.) U.S. Patent Publication Number 2001/0021195 – Access Channel Slot Sharing

b.) U.S. Patent Number 6,317,426 B1 – Feeder Link Spatial Multiplexing in a Satellite

Communication System

The claimed invention is aimed at providing a means of communication to subscribers via forward and return channels. Each of the channels are radiated from celestial satellites, of which an integrated filtering, switching and multiplexing network is incorporated thereof to provide selectively coupled signals transmitted to predetermined cells (beams).

Although, of the cited prior art, Miller et al. discloses a method of transmitting signals to subscribers via communication satellites and gateway; however, the novelty claimed in the present Applicant's invention occurs within the switching/multiplexing architecture of the transmitting satellites. Unlike the cited prior art, the Applicant's means of switching and multiplexing involves collectively coupling a set of signals, which are multiplexed into "regions" that are finally transmitted to a respected region via a predetermined beam.

Schiff implicitly states the Applicant's idea based on the parsing of coupled signals to subscriber terminals via selected beams; however, although in contrast with distinctly comparable differences, Miller et al and Schiff together are considered to constitute to the state of the claimed invention, neither clearly represents the central

method and mode of the Applicant's invention by detailing the switching and multiplexing scheme of the transmitting satellite's architecture.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Randy Peaches whose telephone number is (703) 305-8993. The examiner can normally be reached on Monday - Friday.
